

Kick Shot Mirror Aiming Systems

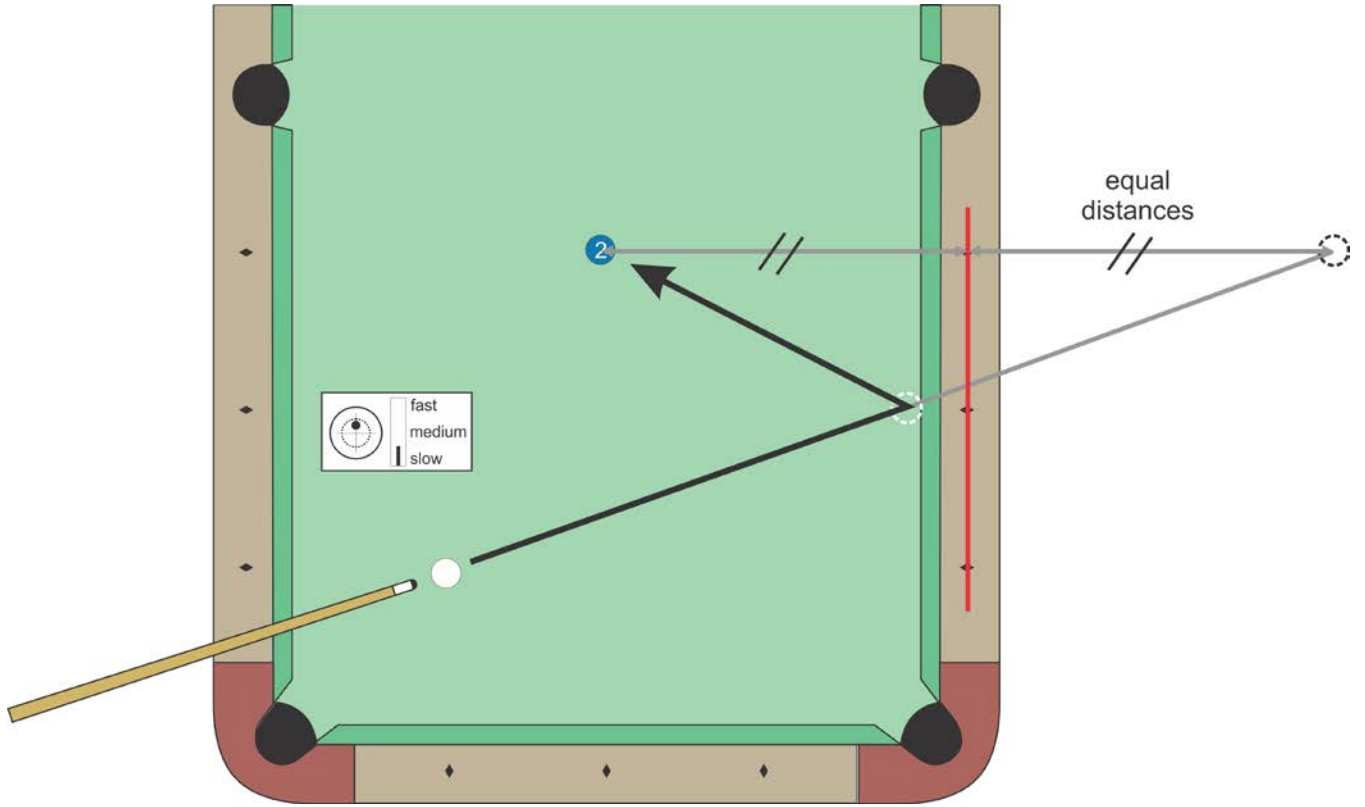

billiards.colostate.edu

Slow-roll equal-distance system:

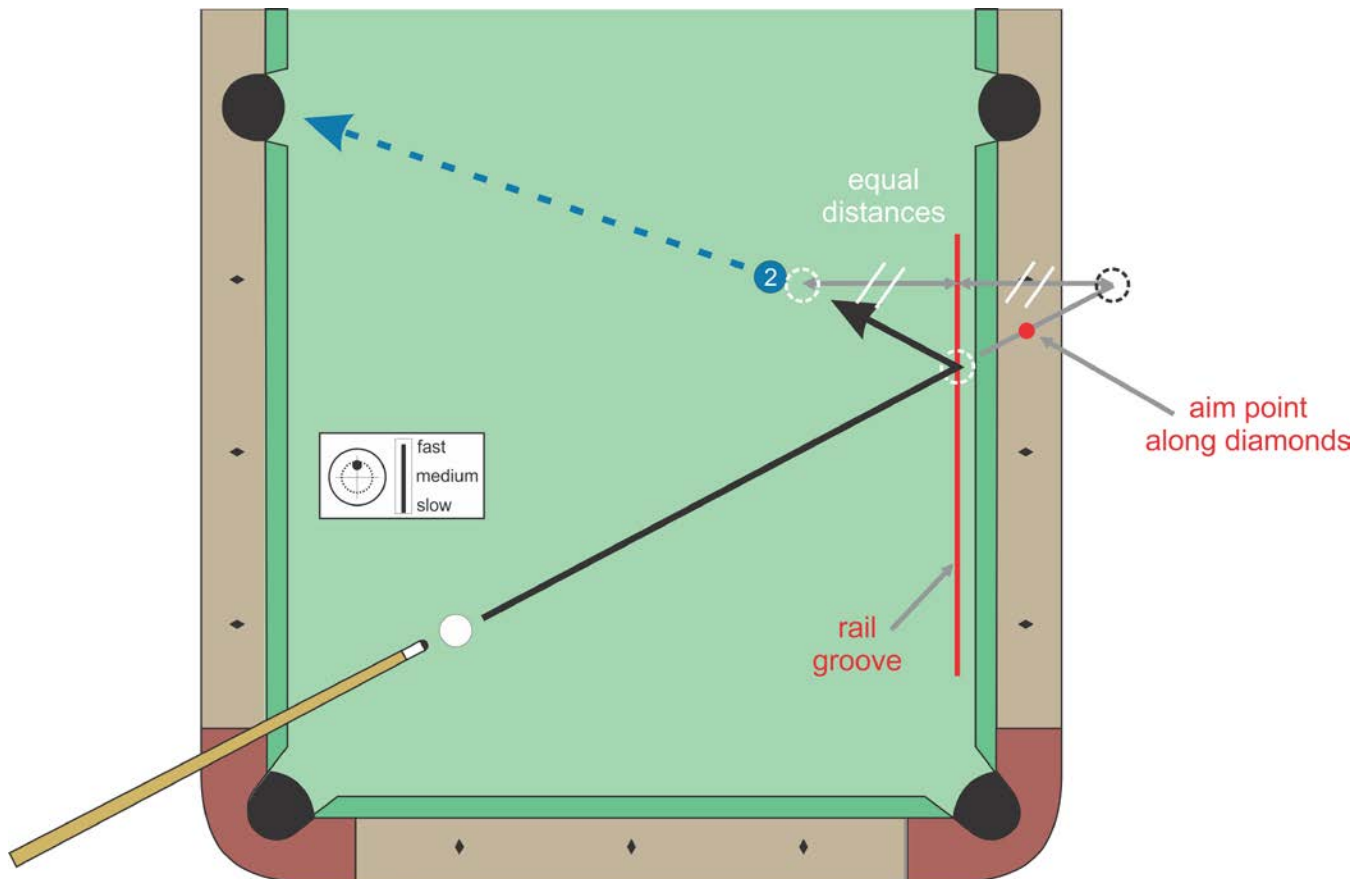

For the initial demo, start with CB in the projected position.

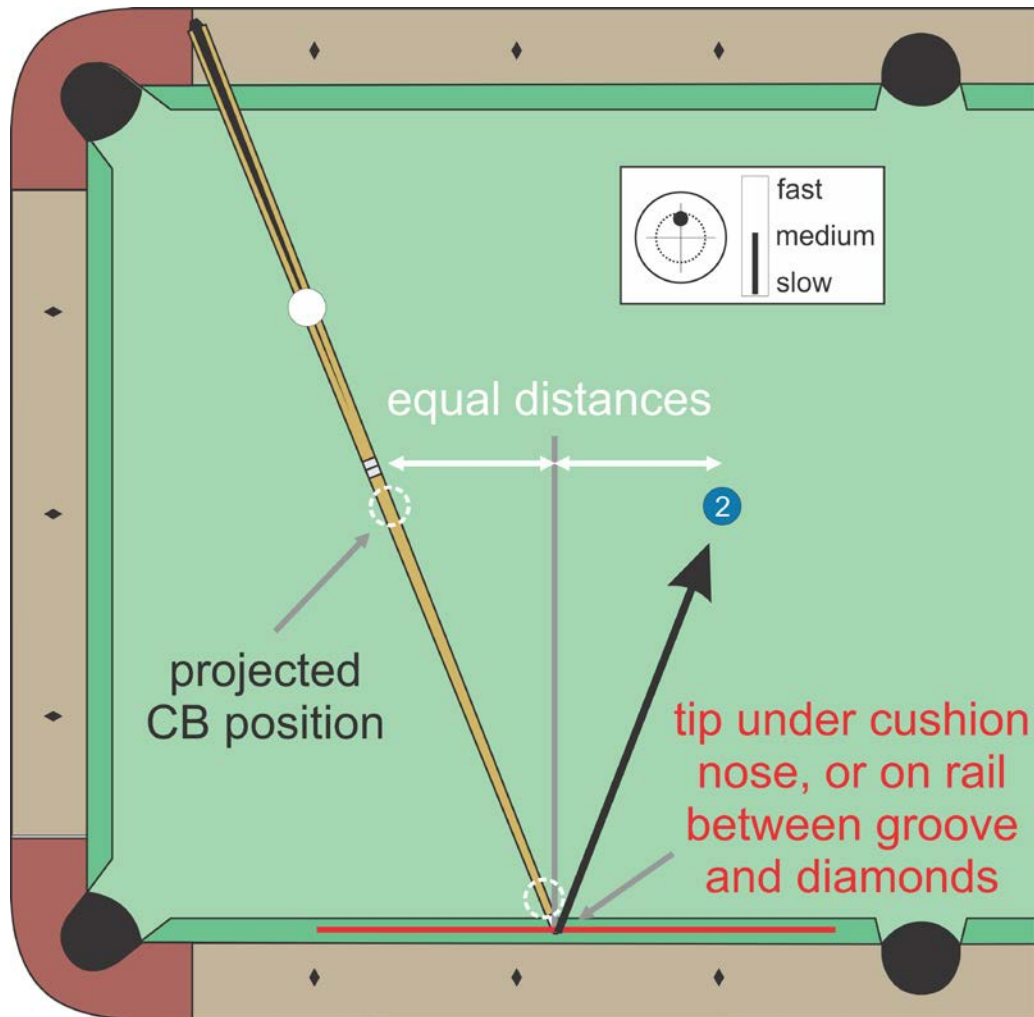

Slow-roll mirror system:

Fast-speed mirror system:

Medium-speed, medium-distance equal-distance system:

Notes:

1. With mirror systems, you can **mirror the CB or the OB**.
2. With both equal-distance and mirror systems, use the **line of diamonds** for **slow-roll** shots, the **rail groove** for **fast/short** roll shots, and **in between** for **medium** speed and distance roll shots.
3. Be very careful the cue tip is on the **vertical centerline** of the CB. Even a small amount of sidespin (unintentional or otherwise) totally changes the rebound angle.
